

## Fire Safety Concept Tree scenario worksheet (NFPA 550)

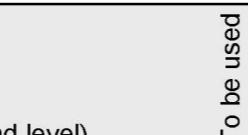

Company	ICL-IP	Behandelt door	2E
Area	Maintankenpark	Date	23-4-2019
Scenario nr.	1		
Scenario title	Koeling H2O2 opslagtanks 81, 82 en 83		
<b>Scenario consequences</b>		<b>Direct causes</b>	
Constructie	Betonnen opvangbak - PE-tanks		
Apparatuur	Leidingen en tanks		
Kabels	N.v.t.		
Bluswaterleiding	N.v.t.		
Besmetting product	N.v.t.		
Sumps			
Luchtleidingen			
Koelwater systeem	Bluswatermet		
stikstof systeem			

## Preventive LOD's

LOD's on left side of the BOW-TIE

## Securing LOD's

1

Concept checklist	Manage method	To	Control item	To	How	How (2nd level)	To	Weight	Possible	Remarks
Manage fire	Control combustion process	<input type="checkbox"/>	Control fuel	<input type="checkbox"/>	Control fuel properties, <b>or</b>	<input type="checkbox"/>				
			<b>OR</b>		Limit fuel quantity, <b>or</b>	<input type="checkbox"/>				
					Control fuel distribution	<input type="checkbox"/>				
			Control the environment	<input type="checkbox"/>	Control physical properties of environment, <b>or</b>	<input type="checkbox"/>				
					Control chemical composition of environment	<input type="checkbox"/>				
	Surpress fire	<input type="checkbox"/>	Automatically surrress fire	<input type="checkbox"/>	Detect fire, <b>and</b>	<input type="checkbox"/>				
					Apply sufficient surpressant	<input type="checkbox"/>				
			<b>OR</b>							
			Manually surpress fire	<input type="checkbox"/>	Detect fire, <b>and</b>	<input type="checkbox"/>				
					Communicate signal, <b>and</b>	<input type="checkbox"/>				
					Decide action, <b>and</b>	<input type="checkbox"/>				
					Respond to site, <b>and</b>	<input type="checkbox"/>				
					Apply sufficient surpressant, <b>and</b>	<input type="checkbox"/>				
					Accessable, <b>and</b>	<input type="checkbox"/>				
					Workable	<input type="checkbox"/>				
	Control fire by construction	<input type="checkbox"/>	Control movement of fire	<input type="checkbox"/>	Vent or remove fire, <b>or</b>	<input type="checkbox"/>				
			<b>AND</b>		Confine/contain fire	<input type="checkbox"/>				
					Provide structural stability	<input type="checkbox"/>				

## Manage exposed

### Limit amount exposed

Safeguard exposed	<input checked="" type="checkbox"/> Defend exposed in place,  <b>OR</b> <input type="checkbox"/> Move exposed	<input checked="" type="checkbox"/> Restrict movement of exposed, and  <input type="checkbox"/> Defend the place, and  <b>Maintain essential environment</b>	<input checked="" type="checkbox"/> <input checked="" type="checkbox"/> <input checked="" type="checkbox"/>		Vaste opstelling tanks en containment
					Koelen door middel van een deluge-installatie Automatisch of handmatig geactiveerd
		<input type="checkbox"/> Cause movement of exposed, and  <input type="checkbox"/> Provide movement means  <b>Provide safe destination (Defend exposed in place is required)</b>	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>		Opvang dient tegen brand bestand te zijn
					Koelsysteem dient functioneel te blijven
		<input type="checkbox"/> Detect need, and  <input type="checkbox"/> Signal need, and  <input type="checkbox"/> Provide instructions  <input type="checkbox"/> Provide capacity, and  <input type="checkbox"/> Provide route completeness, and  <input type="checkbox"/> Provide protected path, and  <input type="checkbox"/> Provide route access	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>		

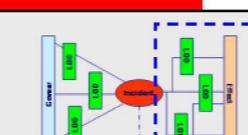

## Prevent fire ignition

ergy sources, or

\_\_\_\_\_

energy sources					
	Provide barrier				
Control heat-energy sources	<input checked="" type="checkbox"/>	Eliminate heat-energy sources, or		<input type="checkbox"/>	
		Control rate of heat-energy release		<input type="checkbox"/>	
Control source-fuel interactions	<input checked="" type="checkbox"/>	Control heat-energy source transport, <input checked="" type="checkbox"/> and	<input checked="" type="checkbox"/> Provide separation, or	<input type="checkbox"/>	
			Provide barrier	<input type="checkbox"/>	
		Control heat-energy transfer processes, <input checked="" type="checkbox"/> and	<input checked="" type="checkbox"/> Control conduction, and	<input type="checkbox"/>	
			Control convection, and	<input type="checkbox"/>	
			Control radiation	<input type="checkbox"/>	
		Control fuel transport	<input checked="" type="checkbox"/> Provide barrier, or	<input type="checkbox"/>	
			Provide separation	<input type="checkbox"/>	
Control fuel	<input checked="" type="checkbox"/>	Eliminate fuel(s), or		<input type="checkbox"/>	
		Control fuel ignitability	<input checked="" type="checkbox"/> Control fuel properties, or	<input type="checkbox"/>	
			Control the environment	<input type="checkbox"/>
