

A photograph showing a grassy field with a fence in the foreground. A silver car is parked on the left side of the field. In the background, there is a pond and some buildings. The sky is overcast.

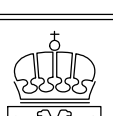

A photograph showing a flooded residential area. In the background, there are several houses with red roofs. A blue car is parked on a grassy area. A long, narrow body of water, likely a flooded road or canal, runs through the center of the image. On the right side, there is a dense line of bare trees and bushes. The water is dark and reflects the sky and the surrounding environment.

A photograph showing a flooded area with a wooden walkway leading into the water. In the background, there are houses and trees under a cloudy sky.

Diagram illustrating the longitudinal profile of the 'nieuwe situatie' (new situation) for the 'goedermeierweg' (goods meierweg). The profile shows the ground level (top line) and the proposed road level (bottom line). Key features include a 'beschoeiing' (paving) at the start, a 'grint' (grit) section, and a 'hek' (fence) section. The road profile is labeled 'goedermeierweg' and 'hekwerk touwplaat'. The elevation scale on the left ranges from 0.750 m. t.o.v. NAP to 0.000 m. The horizontal distance scale at the bottom ranges from 0.000 to 4.000. The diagram is labeled 'nieuwe situatie' at the bottom left.

Horizontal Distance (m)	Ground Elevation (m. t.o.v. NAP)	Proposed Road Elevation (m. t.o.v. NAP)
0.000	0.750	0.750
