

Figure 1 displays the genomic tracks for the 1000 Genomes Project, showing the location of SNPs across the genome. The tracks are organized by chromosome (1 to 22, X, Y) and color-coded by population: African (red), European (green), East Asian (blue), South Asian (orange), and Admixed American (purple). The tracks are labeled with the population names and the number of SNPs. The top track is labeled '1000 Genomes Project' and the bottom track is labeled 'SNP'.
