## LOCATION REQUIREMENTS

- Minimum footprint required – 12m x 15m (please see next slide for space requirements of installation process)
- Weight allowance: 30,000kgs
- Access to power – 32A 3-phase required

For the activation location, there needs to be a minimum area of 20 x 16 m for turning and positioning.

### Accessibility of the grounds

The truck combination has limited maneuverability, a wide access is necessary. The minimum turning radius of the truck combination is 10.00 meters. The truck is able to make a 360-degree turn, both to the left and to the right, within a 20.00-meter 10.00 diameter circle (wall to wall).
